Subject: HOTSITE REPORT: Update - Freedom Industries, Charleston, WV

OSC Dennis Matlock reported that Freedom Industries is still awaiting WVDEP approval to discharge clean water to the Elk River. Recent sampling continues to indicate that the water collected along the containment wall is clean.

Poca property sale is not final yet and another party has shown an interest in purchasing the property. MCHM-contaminated water stored at Poca continues to be sent to Vickery facility for disposal.

The facility has finalized agreements to begin shipping the collected water stored in on-site tanks to EnviroTank Clean and Shamrock. Work continues to dismantle the six small fiberglass tanks. The remediation will begin as soon as coordination with the Bankruptcy Parties is finalized but this work may not begin until late May, early June.
